PROFESSIONAL SUMMARY

Detail-oriented Fibre Technician and ICT Specialist with hands-on experience in optical fibre installation, splicing, network diagnostics, and hardware/software troubleshooting. Solid technical background in networking (TCP/IP, LAN setup), database management, and software development (Java, PHP, SQL). Adept at resolving complex field technical issues and seeking opportunities to leverage telecommunications and software skills to deliver robust tech solutions.

TECHNICAL SKILLS

- **Fibre Optics & Telecommunications:** Fibre optic cable installation, fusion splicing, OTDR testing, optical power meter testing, drop cable routing, FTTH/FTTB deployments.
- **Networking & Infrastructure:** LAN setup & configuration, TCP/IP, subnetting, RJ45 cable crimping (T568A/T568B), Cisco Packet Tracer, router & switch configuration.
- **Hardware & Support:** PC assembly/disassembly, diagnostic troubleshooting, hardware upgrades, OS installation (Windows/Linux), end-user technical support.
- **Software & Web Development:** Java, PHP, C, HTML5, CSS3, JavaScript, Kotlin, responsive UI design, debugging.
- **Databases & Tools:** MySQL, relational database design, SQL CRUD operations, normalization, phpMyAdmin, VS Code, Android Studio.
- **Core Competencies:** Field troubleshooting, systems analysis (DFDs/Flowcharts), technical documentation, safety compliance.

WORK EXPERIENCE

Fibre Technician **Aug 2026 – Present**

Tashnet Networks

- **Installation & Deployment:** Execute end-to-end FTTH/FTTB fibre installations, including cable pulling, enclosure termination, and drop cable routing.
- **Splicing & Testing:** Perform fusion splicing on single-mode and multi-mode optical fibres; conduct insertion loss testing using OTDR and Optical Power Meters.
- **Maintenance & Repairs:** Diagnose and repair link faults, damaged cable runs, and signal degradation to maintain high network uptime and service quality.
- **Customer Equipment Setup:** Install and configure ONTs/ONUs, Wi-Fi routers, and switches for commercial and residential subscribers.

EDUCATION & TRAINING

Diploma in Information and Communication Technology (DICT) **July 2026**

Mukurwe-ini Technical Training Institute

- **Core Modules:** Computer Hardware and Software Maintenance, Networking and Network Management, Software Development, Data Security and Protection, User Support.

Electrical Installation (Wireman Certificate) **Nov 2024**

Giathugu Vocational Training Centre

- **Core Skills:** Domestic electrical wiring, lighting circuits, switch & socket installation, fault diagnosis, safety compliance.

PRACTICAL ACADEMIC PROJECTS

Online Voting System | *PHP, MySQL, HTML, CSS, JavaScript* **[GitHub]**

- **Web Platform Development:** Engineered a web-based voting platform featuring secure user registration and role-based admin authentication.
- **Database Integration:** Integrated MySQL databases for efficient ballot and vote management.

Book Catalog Mobile Application | *Java, Android Studio* **[GitHub]**

- **Mobile Development:** Developed an Android app for cataloging books, featuring custom list layouts and dynamic image displays.
